Image Retrieval from the World Wide Web: Issues, Techniques, and Systems

M. L. Kherfi, D. Ziou, A. Bernardi

March 2004 ACM Computing Surveys (CSUR), Volume 36 Issue 1

Publisher: ACM Press

Full text available: pdf(294.13 KB) Additional Information: full citation, abstract, references, index terms

With the explosive growth of the World Wide Web, the public is gaining access to massive amounts of information. However, locating needed and relevant information remains a difficult task, whether the information is textual or visual. Text search engines have existed for some years now and have achieved a certain degree of success. However, despite the large number of images available on the Web, image search engines are still rare. In this article, we show that in order to allow people to profi ...

4 The art of search: a study of art directors

June 1992 Proceedings of the SIGCHI conference on Human factors in computing

systems
Publisher: ACM Press

Full text available: pdf(1.50 MB)

Additional Information: <u>full citation</u>, <u>abstract</u>, <u>references</u>, <u>citings</u>, <u>index</u> terms

We formulated a model of visual search by conducting a work flow study and task analysis of art directors as they searched for images to use in an advertisement. The analysis revealed the presence of artistic and image concepts, flexible structures which guide the search and are molded by them. Analysis results were used to build a model-based interface for visual search. Results from presenting the interface to users indicate that the interface has the potential to make significant contrib ...

5 Mediators over taxonomy-based information sources

Yannis Tzitzikas, Nicolas Spyratos, Panos Constantopoulos

March 2005 The VLDB Journal — The International Journal on Very Large Data Bases,

Volume 14 Issue 1

Publisher: Springer-Verlag New York, Inc.

Full text available: pdf(428.09 KB) Additional Information: full citation, abstract

We propose a mediator model for providing integrated and unified access to multiple taxonomy-based sources. Each source comprises a taxonomy and a database that indexes objects under the terms of the taxonomy. A mediator comprises a taxonomy and a set of relations between the mediator's and the sources' terms, called articulations. By combining different modes of query evaluation at the sources and the mediator and different types of query translation, a flexible, efficient scheme ...

**Keywords**: Approximate query translation, Information integration, Mediators, Taxonomies

6 Enhanced abstract data types in object-relational databases

Praveen Seshadri

August 1998 The VLDB Journal — The International Journal on Very Large Data Bases, Volume 7 Issue 3

Publisher: Springer-Verlag New York, Inc.

Full text available: pdf(119.21 KB) Additional Information: full citation, abstract, citings, index terms

The explosion in complex multimedia content makes it crucial for database systems to support such data efficiently. This paper argues that the "blackbox" ADTs used in current object-relational systems inhibit their performance, thereby limiting their use in emerging applications. Instead, the next generation of object-relational database systems should be based on enhanced abstract data type (E-ADT) technology. An (E-ADT) can expose the semantics of its methods to the database ...

8 MoodView: an advanced graphical user interface for OODBMSs

Publisher: ACM Press

Full text available: pdf(777.58 KB) Additional Information: full citation, abstract, citings, index terms

OODBMSs need more than declarative query languages and programming languages as their interfaces since they are designed and implemented for complex applications requiring more advanced and easy to use visual interfaces. We have developed a complete programming environment for this purpose, called MoodView. MoodView translates all the user actions performed through its graphical interface to SQL statements and therefore it can be ported onto any object-oriented database systems using SQL.

Keywords: graphical user interfaces, object-oriented databases

9 Special issue: Al in engineering

D. Sriram, R. Joobbani

April 1985 ACM SIGART Bulletin, Issue 92

Publisher: ACM Press

Full text available: pdf(8.79 MB) Additional Information: full citation, abstract

The papers in this special issue were compiled from responses to the announcement in the July 1984 issue of the SIGART newsletter and notices posted over the ARPAnet. The interest being shown in this area is reflected in the sixty papers received from over six countries. About half the papers were received over the computer network.

10 Design expo: Unifying the cisco intranet through hierarchical navigation

Michael Lenz, Jim Beno, Mathew Burns, Sharon Meaney

April 2005 CHI '05 extended abstracts on Human factors in computing systems

Publisher: ACM Press

Full text available: pdf(2.48 MB) Additional Information: full citation, abstract, index terms

Cisco web-enabled numerous processes during a period of rapid growth, resulting in a number of disconnected sites and tools. Although this innovation cut costs, employees could not easily find information and had to learn new models of navigation and interaction. This paper describes how the Intranet Strategy team responded by designing a hierarchical navigation system that met user and business requirements, connected numerous isolated sites, and encouraged standardization and governance of the ...

13 Creating a new channel for campus communication

Mark Allen Nakamura

October 2004 Proceedings of the 32nd annual ACM SIGUCCS conference on User services

Publisher: ACM Press

Full text available: pdf(171.17 KB) Additional Information: full citation, abstract, index terms

Walk around any college campus and in less than a minute you'll most likely notice a plethora of flyers and posters. The overwhelming result can be hundreds of posters competing with each other on cluttered bulletin boards, sidewalks, and even bathroom stall doors.

A team of administrators and IT staffers at Colgate University set out to find a new communication tool to minimize the poster clutter effect and to provide students an innovative way to promote their events. The solution? A ...

14 Model-driven design and deployment of service-enabled web applications

Ioana Manolescu, Marco Brambilla, Stefano Ceri, Sara Comai, Piero Fraternali August 2005 ACM Transactions on Internet Technology (TOIT), Volume 5 Issue 3

Publisher: ACM Press

Additional Information: full citation, abstract, references, index terms Full text available: pdf(3.07 MB)

Significant effort is currently invested in application integration, enabling business processes of different companies to interact and form complex multiparty processes. Web service standards, based on WSDL (Web Service Definition Language), have been adopted as process-to-process communication paradigms. However, the conceptual modeling of applications using Web services has not yet been addressed. Interaction with Web services is often specified at the level of the source code; thus, Web serv ...

15 Database & data management: Digital asset management using a native XML

database implementation

Shalaka Natu, John Mendonca

October 2003 Proceedings of the 4th conference on Information technology curriculum CITC4 '03

**Publisher: ACM Press** 

Full text available: pdf(196.63 KB) Additional Information: full citation, abstract, references, index terms

Digital Asset Management (DAM), the management of digital content so that it can be cataloged, searched and re-purposed, is extremely challenging for organizations that rely on image handling and expect to gain business value from these assets. Metadata plays a crucial role in their management, and XML, with its inherent support for structural representation, is an ideal technology for this. This paper analyzes the capabilities of a native XML database solution via the development of a "proof of ...

16 Evaluating hypermedia and learning: methods and results from the Perseus Project

Gary Marchionini, Gregory Crane

January 1994 ACM Transactions on Information Systems (TOIS), Volume 12 Issue 1

**Publisher: ACM Press** 

Full text available: pdf(2.57 MB)

Additional Information: full citation, abstract, references, citings, index terms, review

The Perseus Project has developed a hypermedia corpus of materials related to the ancient Greek world. The materials include a variety of texts and images, and tools for using these materials and navigating the sytem. Results from a three-year evaluation of Perseus use in a variety of college settings are described. The evaluation assessed both this particular system and the application of the technological genre to information management and to learning. The evaluation used a variety of me ...

18 OAI application: Using the open archives initiative protocols with EAD

Christopher J. Prom, Thomas G. Habing

July 2002 Proceedings of the 2nd ACM/IEEE-CS joint conference on Digital libraries Publisher: ACM Press

Full text available: pdf(220.68 KB) Additional Information: full citation, abstract, references, index terms

The Open Archives Initiative Protocols present a promising opportunity to make metadata about archives, manuscript collections, and cultural heritage resources easier to locate and search. However, several technical barriers must be overcome before useful OAI records can be produced from the disparate metadata formats used to describe these resources. This paper examines Encoded Archival Description (EAD) as a test case of the issues to be addressed in transforming cultural heritage metadata to ...

Keywords: encoded archival description, interoperability, open archives initiative

19 Evaluation: Developing a digital learning environment: an evaluation of design and

implementation processes

Leslie Champeny, Christine L. Borgman, Gregory H. Leazer, Anne J. Gilliland-Swetland, Kelli A. Millwood, Leonard D'Avolio, Jason R. Finley, Laura J. Smart, Patricia D. Mautone, Richard E. Mayer, Richard A. Johnson

June 2004 Proceedings of the 4th ACM/IEEE-CS joint conference on Digital libraries

Publisher: ACM Press

Full text available: pdf(216.42 KB) Additional Information: full citation, abstract, references

The Alexandria Digital Earth Prototype (ADEPT) Project (1999--2004) builds upon the

Alexandria Digital Library Project (1994--1999) to add functions and services for undergraduate teaching to a digital library of geospatial resources. The 'Digital Learning Environment' (DLE) services are being developed and evaluated iteratively over the course of this research project. In the 2002--2003 academic year, the DLE was implemented during the fall and spring terms in undergraduate geography courses at ...
